FAIRS Export Certificate Report

Annual Report

2007

Approved by:

Laura Scandurra
U.S. Embassy

Prepared by:

Vinita Sharma

Report Highlights:

This report provides guidance on export certificate requirements for a representative sample of products. All sections of this report have been reviewed and updated to reflect New Zealand's most recent certification requirements. However, as these regulations are constantly updated, exporters interested in exporting to New Zealand should check the Ministry of Agriculture's website for the most up-to-date information.

Includes PSD Changes: No
Includes Trade Matrix: No
Annual Report

DISCLAIMER: This report was prepared by the Office of Agricultural Affairs of the USDA/Foreign Agricultural Service in Wellington, New Zealand for U.S. exporters of domestic food and agricultural products. While every possible care was taken in the preparation of this report, information provided may not be completely accurate either because policies have changed since its preparation, or because clear and consistent information about these policies was not available. It is highly recommended that U.S. exporters verify the full set of import requirements with their foreign customers, who are normally best equipped to research such matters with local authorities, before any goods are shipped. **FINAL IMPORT APPROVAL OF ANY PRODUCT IS SUBJECT TO THE IMPORTING COUNTRY'S RULES AND REGULATIONS AS INTERPRETED BY BORDER OFFICIALS AT THE TIME OF PRODUCT ENTRY.**

Please contact this office if you have any comments, corrections or suggestions about the material contained in this report:

Summary

Ministry of Agriculture/Biosecurity New Zealand

The Ministry of Agriculture and Forestry (MAF) leads and coordinates the New Zealand Government's biosecurity program. MAF develops import standards, manages biosecurity risks at the border, attempts to eradicate or contain certain pests, and provides export certification. [Biosecurity New Zealand](#), an organization within MAF formed in 2004, is the lead agency in New Zealand's biosecurity system. It is tasked with a leadership role that encompasses economic, environmental, social and cultural outcomes. It also has international trade and animal welfare responsibilities. In July of 2007, Biosecurity New Zealand merged with the MAF Quarantine Service. The [New Zealand Food Safety Authority](#) (NZFSA) is the controlling authority for imports and exports of food and food-related products.

U.S. exporters interested in exporting plants and plant products, animals and animal products, and wood and wood products are required to meet MAF requirements specified in "import health standards" (IHS). Import health standards for specific products can be found at: <http://www.biosecurity.govt.nz/commercial-imports/import-health-standards/search>

All New Zealand import health standards are based upon risk analyses, which assess either a commodity or a pest/pathway combination. New Zealand takes legislative requirements and international obligations into account when conducting risk analyses and developing import health standards. The principal document for all New Zealand import health standards is the Biosecurity Act (1993). New Zealand also adheres to the guidelines on risk analysis developed under the auspices of the Interim Commission on Phytosanitary Measures operating within the framework of the International Plant Protection Convention, and the World Trade Organization Agreement on the Application of Sanitary and Phytosanitary Measures.

Examples of New Zealand Export Certificate requirements

The table below provides export certificate requirements for many products exported to New Zealand from the United States. For more detailed information, and to ensure access to the most up-to-date information, please refer to the Biosecurity New Zealand website at: www.biosecurity.govt.nz/commercial-imports/import-health-standards/search

SECTION I – A SELECTION OF EXPORT CERTIFICATES REQUIRED BY GOVERNMENT

Products	Title of Certificate	Attestation Required on Certificate	Purpose	Requested by
Peanuts	No phytosanitary certificate required	No certification or inspection required by Biosecurity New Zealand if packaged for direct retail sale or in packages up to and including 10 kgs. If more than 10 kgs, inspection is required. Please check the New Zealand Import Health Standard (IHS) (Section 9.8) Stored products for Human Consumption for more information.	Biosecurity	Biosecurity New Zealand is the exclusion, eradication or effective management of risks posed by pests and diseases to the economy, environment and human health (See www.biosecurity.govt.nz)
	Certificate of analysis from USDA or a State Department of Agriculture is required	Consignments are tested at intervals depending on the frequency of import. In all cases, a certificate of analysis is required for each consignment. Please check section 2.1 of the New Zealand Food Safety Authority's "Acceptance of Recognized Certificates" on Peanuts .	Peanuts are considered a high risk food because they have been found to contain mycotoxins, mold and insects.	New Zealand Food Safety Authority (NZFSA) sets policies, criteria and procedures to monitor the safety of imported food for human consumption and for food containers (see www.nzfsa.govt.nz)
Roasted/Salted Pistachios	No phytosanitary certificate required	No certification or inspection required by Biosecurity New Zealand if packaged for direct retail sale or in packages up to and including 10 kgs. If more than 10 kgs, inspection is required. Please check the New Zealand Import Health Standard (IHS) (Section 9.8) Stored products for Human Consumption for more information.	Biosecurity	Biosecurity New Zealand
Walnuts, Pecans, Almonds	No phytosanitary certificate required	No certification or inspection required by Biosecurity New Zealand if packaged for direct retail sale or in packages up to and including 10 kgs. If more than 10 kgs, inspection is required. Please check the New Zealand Import Health Standard (IHS) (Section 9.8) Stored products for Human Consumption for more information.	Biosecurity	Biosecurity New Zealand
Dried Fruits	No phytosanitary certificate required	There are no certification or inspection requirements for dried, freeze dried, dehydrated or flaked fruit and vegetables that are commercially manufactured or produced and listed in the Plants Biosecurity Index http://www1.maf.govt.nz/cgi-bin/bioindex/bioindex.pl , except for those that may have seeds that are entered as "Entry Prohibited"	Biosecurity	Biosecurity New Zealand

		<p>and those listed in sections 9.3, 9.4 and 9.7 of the Stored products for Human Consumption import health standard.</p> <p>Dried raisins on stems may be imported.</p> <p>NZFSA has requirements for dried dates. Refer to the NZFSA website: http://www.nzfsa.govt.nz/imported-food/high-risk/index.htm</p>		
Stone Fruits (California Nectarines and Peaches)	Phytosanitary certificate issued by the Animal Plant Health Inspection Service (APHIS) of the U.S. Department of Agriculture (USDA) is required.	Please see section 6.1.4 of the Fresh Peach and Nectarine from California import health standard regarding phytosanitary certificate requirements.	Biosecurity	Biosecurity New Zealand
	Additional declarations are required on the phytosanitary certificate	<p>APHIS must provide the additional declarations to the phytosanitary certificate:</p> <p>"The peaches and nectarines in this consignment have:</p> <ul style="list-style-type: none"> - been inspected in accordance with appropriate official procedures and found to be free of any visually detectable regulated pests specified by the New Zealand Ministry of Agriculture and Forestry. <p>AND</p> <ul style="list-style-type: none"> - been treated in accordance with Appendix 1(b) of the Workplan between NZ MAF and APHIS, USDA. <p>AND</p> <ul style="list-style-type: none"> - undergone appropriate pest control activities that are effective against those Risk group 2 regulated pests specified by NZ MAF. <p>OR</p> <p>been sourced from an area free (verified by an official detection survey) from those Risk group 2 regulated pests specified by NZ MAF."</p> <p>Please check section 6.1.5 of the Fresh Peach and Nectarine from California import health standard for the most recent requirements.</p>		

Table Grapes (State of California)	Phytosanitary certificate issued by the Animal Plant Health Inspection Service (APHIS) of the U.S. Department of Agriculture (USDA) is required.	Please see section 6.1.5 of the import health standard on Table Grapes from the State of California for information on phytosanitary requirements.	Biosecurity	Biosecurity New Zealand
	Additional declarations required on the phytosanitary certificate	APHIS must provide the following additional declarations to the phytosanitary certificates: (i) This is to certify that the table grapes described herein have been inspected according to appropriate official procedures and are considered to be free from the quarantine pests specified by New Zealand MAF and to conform with the current phytosanitary requirements of New Zealand MAF, including those for regulated non-quarantine pests; AND (ii) The table grapes in this consignment have been treated in accordance with Appendix 1 (b) of the Workplan between NZ MAF and USDA APHIS. Please check section 6.1.6 of the Table Grapes from the State of California import health standard for the most recent requirements.		
Cherry (State of California)	Phytosanitary certificate issued by the Animal Plant Health Inspection Service (APHIS) of the U.S. Department of Agriculture (USDA) is required.	Please see section 4.1 of the import health standard on Fresh fruit and vegetables for information on phytosanitary requirements.	Biosecurity	Biosecurity New Zealand

	Additional declarations required on the phytosanitary certificate	<p>APHIS must provide the following additional declarations to the phytosanitary certificates: The cherries in this consignment have:</p> <p>(i) been inspected in accordance with appropriate official procedures and found to be free from any visually detectable quarantine pests specified by the New Zealand Ministry of Agriculture and Forestry. AND</p> <p>(ii) undergone appropriate pest control activities that are effective against:</p> <p><i>Monilinia fructigena</i></p> <p>OR</p> <p>been sourced from an area free (verified by an official detection survey) from:</p> <p><i>Monilinia fructigena</i> AND</p> <p>(iii) treated in accordance with Appendix 1 of the Arrangement between the New Zealand Ministry of Agriculture and Forestry and the United States Department of Agriculture, Animal and Plant Health Inspection Service concerning the access of host material of fruit fly</p> <p>Please see page 358 of the import health standard on Fresh fruit and vegetables for information on additional declaration on phytosanitary certificate</p>		
Cherry - <i>Prunus avium</i> (States of Washington , Oregon and Idaho)	Phytosanitary certificate issued by the Animal Plant Health Inspection Service (APHIS) of the U.S. Department of Agriculture (USDA) is required.	Please see section 6.1.5 of the import health standard on IHS on Cherries for information on phytosanitary requirements.	Biosecurity	Biosecurity New Zealand
	Additional declarations on the phytosanitary certificate are required.	<p>APHIS must also provide the following additional declarations: (i) This is to certify that the cherries described herein have been inspected according to appropriate official procedures and are considered to be free from the quarantine pests specified by New Zealand MAF and to conform with the current phytosanitary requirements of New Zealand MAF, including those for regulated non-quarantine pests.;</p> <p>(ii) This is to certify that the cherries in this consignment have undergone appropriate pest control activities that are effective against those regulated high impact pests specified by NZ MAF.</p> <p>Please see section 6.1.6 of the import health standard on IHS on Cherries for information on additional phytosanitary requirements.</p>		
Shelf Stable Pet Foods with Bovine Meat	No phytosanitary certificate required.	Please see section 7.2 of the import health standard on Pet Foods for information on canned/retorted pet foods containing beef/ other bovine meat products/by-products and other animal products.	Biosecurity	Biosecurity New Zealand

	Zoosanitary certificate required. 	Please see section 10 of the import health standard on Pet Foods for a sample Zoosanitary certificate.		
Frozen Pig By Products	Zoosanitary certificate required.	Please see section 12 of Import Health Standard on Frozen Pig Meat for a sample Zoosanitary certificate.	Biosecurity	Biosecurity New Zealand

Fruits (Mandarin/ tangerine, orange, apricot, pears, plums)	Phytosanitary certificates issued by the Animal Plant Health Inspection Service (APHIS) of the U.S. Department of Agriculture (USDA) are required for all fruit and vegetable consignments entering New Zealand	Please see section 2.1 and 2.2 of the import health standard on Fresh fruit and vegetables for information on phytosanitary certificates.	Biosecurity	Biosecurity New Zealand
	Additional declaration required on the phytosanitary certificate are required – Mandarin/ Tangerine	<p>APHIS must provide the following additional declarations to the phytosanitary certificates: Mandarins/tangerines in this consignment have:</p> <p>(i) been inspected in accordance with appropriate official procedures and found to be free from any visually detectable quarantine pests, specified by the New Zealand Ministry of Agriculture and Forestry.</p> <p>AND</p> <p>(ii) undergone appropriate pest control activities that are effective against: <i>Aleurocanthus woglumi</i> ; <i>Spiroplasma citri</i> [VO] ; <i>Xanthomonas campestris</i> OR been sourced from an area free (verified by an official detection survey) from: <i>Aleurocanthus woglumi</i> ; <i>Spiroplasma citri</i> [VO] ; <i>Xanthomonas campestris</i> AND</p> <p>(iii) treated in accordance with Appendix 1 of the Arrangement between the New Zealand Ministry of Agriculture and Forestry and the United States Department of Agriculture, Animal and Plant Health Inspection Service concerning the access of host material of fruit fly species of economic significance into New Zealand from the United States of America .</p> <p>Please see page 350 of Import Health Standard on Fresh fruit and vegetables for more information.</p>		

	Additional declaration required on the phytosanitary certificate are required – Orange	<p>APHIS must provide the following additional declarations to the phytosanitary certificates:</p> <p>The oranges in this consignment have:</p> <p>(i) been inspected in accordance with appropriate official procedures and found to be free from any visually detectable quarantine pests, specified by the New Zealand Ministry of Agriculture and Forestry. AND</p> <p>(ii) undergone appropriate pest control activities that are effective against:</p> <p><i>Aleurocanthus woglumi</i>; <i>Bemisia tabaci</i> [strain] <i>Thrips palmi</i> OR</p> <p>been sourced from an area free (verified by an official detection survey) from:</p> <p><i>Aleurocanthus woglumi</i> <i>Bemisia tabaci</i> [strain] <i>Thrips palmi</i> AND</p> <p>(iii) treated in accordance with Appendix 1 (b) of the Arrangement between the New Zealand Ministry of Agriculture and Forestry and the United States Department of Agriculture, Animal and Plant Health Inspection Service concerning the access of host material of fruit fly species of economic significance into New Zealand from the United States of America</p> <p>Please see page 351 of Import Health Standard on Fresh fruit and vegetables for more information</p>		
	Additional declaration required on the phytosanitary certificate are required – Apricot	<p>APHIS must provide the following additional declarations to the phytosanitary certificates:</p> <p>Apricots in this consignment have:</p> <p>(i) been inspected in accordance with appropriate official procedures and found to be free from any visually detectable quarantine pests, specified by the New Zealand Ministry of Agriculture and Forestry. AND</p> <p>(ii) undergone appropriate pest control activities that are effective against:</p> <p><i>Monilinia fructigena</i> OR</p> <p>been sourced from an area free (verified by an official detection survey) from:</p> <p><i>Monilinia fructigena</i> AND</p> <p>(iii) treated in accordance with Appendix 1 of the Arrangement between the New Zealand Ministry of Agriculture and Forestry and the United States Department of Agriculture, Animal and Plant Health Inspection Service concerning the access of host material of fruit fly species of economic significance into New Zealand from the United States of America .</p> <p>Please see page 357 of Import Health Standard on Fresh fruit and vegetables for more information</p>		

	<p>Additional declaration required on the phytosanitary certificate are required – Plums</p>	<p>APHIS must provide the following additional declarations to the phytosanitary certificates: The plums in this consignment have: (i) been inspected in accordance with appropriate official procedures and found to be free from any visually detectable quarantine pests, specified by the New Zealand Ministry of Agriculture and Forestry. AND (ii) undergone appropriate pest control activities that are effective against: <i>Monilinia fructigena</i> OR been sourced from an area free (verified by an official detection survey) from: <i>Monilinia fructigena</i> AND (iii) treated in accordance with Appendix 1 of the Arrangement between the New Zealand Ministry of Agriculture and Forestry and the United States Department of Agriculture, Animal and Plant Health Inspection Service concerning the access of host material of fruit fly species of economic significance into New Zealand from the United States of America .</p> <p>Please see page 360 of Import Health Standard on Fresh fruit and vegetables for more information</p>		
--	---	---	--	--

	Additional declaration required on the phytosanitary certificate are required – Pears (State of Washington)	<p>The pears in this consignment have:</p> <p>(i) been inspected in accordance with appropriate official procedures and found to be free from any visually detectable quarantine pests, specified by the New Zealand Ministry of Agriculture and Forestry.</p> <p>AND</p> <p>(ii) undergone appropriate pest control activities that are effective against: <i>Conotrachelus nenuphar</i></p> <p>OR</p> <p>been sourced from an area free (verified by an official detection survey) from: <i>Conotrachelus nenuphar</i></p> <p>AND</p> <p>(iii) treated in accordance with Appendix 1 (d) of the Arrangement between the New Zealand Ministry of Agriculture and Forestry and the United States Department of Agriculture, Animal and Plant Health Inspection Service concerning the access of host material of fruit fly species of economic significance into New Zealand from the United States of America .</p> <p>Please see page 363 of Import Health Standard on Fresh fruit and vegetables for more information on additional phytosanitary requirements.</p>		
	Additional declaration required on the phytosanitary certificate are required – Pears (State of California)	<p>APHIS must provide the following additional declarations to the phytosanitary certificates:</p> <p>The pears in this consignment have:</p> <p>(i) been inspected in accordance with appropriate official procedures and found to be free from any visually detectable quarantine pests, specified by the New Zealand Ministry of Agriculture and Forestry.</p> <p>AND</p> <p>(ii) undergone appropriate pest control activities that are effective against: <i>Conotrachelus nenuphar</i></p> <p>OR</p> <p>been sourced from an area free (verified by an official detection survey) from: <i>Conotrachelus nenuphar</i></p> <p>AND</p> <p>(iii) treated in accordance with Appendix 1 (b) of the Arrangement between the New Zealand Ministry of Agriculture and Forestry and the United States Department of Agriculture, Animal and Plant Health Inspection Service concerning the access of host material of fruit fly species of economic significance into New Zealand from the United States of America .</p> <p>Please see page 364 of Import Health Standard on Fresh fruit and vegetables for more information</p>		

	Additional declaration required on the phytosanitary certificate are required – Pears (State of Idaho)	<p>APHIS must provide the following additional declarations to the phytosanitary certificates: The pears in this consignment have:</p> <p>(i) been inspected in accordance with appropriate official procedures and found to be free from any visually detectable quarantine pests, specified by the New Zealand Ministry of Agriculture and Forestry. AND</p> <p>(ii) undergone appropriate pest control activities that are effective against: <i>Conotrachelus nenuphar</i> OR been sourced from an area free (verified by an official detection survey) from: <i>Conotrachelus nenuphar</i> AND</p> <p>(iii) treated in accordance with Appendix 1(h) of the Arrangement between the New Zealand Ministry of Agriculture and Forestry and the United States Department of Agriculture, Animal and Plant Health Inspection Service concerning the access of host material of fruit fly species of economic significance into New Zealand from the United States of America .</p> <p>Please see page 365 of Import Health Standard on Fresh fruit and vegetables for more information</p>		
	Additional declaration required on the phytosanitary certificate are required – Pears (State of Oregon)	<p>The pears in this consignment have:</p> <p>(i) been inspected in accordance with appropriate official procedures and found to be free from any visually detectable quarantine pests, specified by the New Zealand Ministry of Agriculture and Forestry. AND</p> <p>(ii) undergone appropriate pest control activities that are effective against: <i>Conotrachelus nenuphar</i> OR been sourced from an area free (verified by an official detection survey) from: <i>Conotrachelus nenuphar</i> AND</p> <p>(iii) treated in accordance with Appendix 1(i) of the Arrangement between the New Zealand Ministry of Agriculture and Forestry and the United States Department of Agriculture, Animal and Plant Health Inspection Service concerning the access of host material of fruit fly species of economic significance into New Zealand from the United States of America .</p> <p>Please see page 366 of Import Health Standard on Fresh fruit and vegetables for more information</p>		
Grains/Seeds for Human Consumption	<p>Phytosanitary Certificate</p> <p>Additional declarations are required depending on the product</p> <p>Grains/Seed Analysis Certificate</p>	<p>U.S. exporters must meet certification requirement for individual products. Various options from pre-inspection certification to post-entry treatments are available under specific grain and seed categories. Each grain and seed product has different certification requirements.</p> <p>Please see Import Health Standards on various Grains and Seeds and import regulations.</p>	Biosecurity	Biosecurity New Zealand

SECTION II – PURPOSE OF SPECIFIC EXPORT CERTIFICATES

The purpose of the export certificates is to meet New Zealand's biosecurity requirements. New Zealand defines biosecurity as "the exclusion, eradication or effective management of risks posted by pests and diseases to the economy, environment and human health." New Zealand's biosecurity requirements cover terrestrial, freshwater and marine environments.

SECTION III – SPECIFIC ATTESTATION REQUIRED ON THE EXPORT CERTIFICATE

Please refer to the Table under Section I, for required attestations, and the Biosecurity New Zealand website for specific information on IHSs and attestation requirements.

<http://www.biosecurity.govt.nz/commercial-imports/import-health-standards/search>

SECTION IV – GOVERNMENT CERTIFICATE LEGAL ENTRY REQUIREMENTS

New Zealand's biosecurity requirements are based on the Biosecurity Act of 1993. The act provides for management of risks associated with imported goods such as produce, seeds and plants principally through "import health standards" (IHS).

Original documents relating to the shipment must accompany each shipment. Most certificates are valid for one shipment only and are required to be issued by APHIS, USDA.

SECTION V – OTHER CERTIFICATION/ACCREDITATION REQUIREMENTS

U.S. exporter are required to meet both biosecurity and food safety requirements. For more information on New Zealand's food safety requirements, please read the FAS/Wellington report entitled Food and Agricultural Import Regulations & Standards which can be found at <http://www.fas.usda.gov/scripts/AttacheRep/default.asp>. and visit the website of the [New Zealand Food Safety Authority](#)
